Tires: Foamfilled

Description

This **2016 JLG 450AJ Articulating Boom Lift** is a versatile rough-terrain aerial lift designed for construction, maintenance, industrial, and outdoor applications. With approximately **2,669 hours**, this machine combines a 45 ft platform height with articulating boom geometry for reaching up, over, and around obstacles.

The 450AJ features **4-wheel drive** and aggressive rough-terrain tires for improved mobility on demanding jobsites. Its articulating boom and jib provide excellent positioning flexibility, while the **550 lb platform capacity** gives operators room for personnel, tools, and materials.

This machine presents very well in the photos with clean paint, a clean platform and boom assembly, and good-looking tires.

Frequently Asked Questions About JLG Articulating Boom Lifts

What is an articulating boom lift used for?

Articulating boom lifts from JLG are designed for **elevated work in hard-to-reach or obstructed areas**. Their multiple hinged sections allow operators to go “up and over” obstacles, making them ideal for:

- Building and **facility maintenance**
- **Construction work** around structures
- **Tree trimming** and outdoor signage
- **Electrical and utility work**

These lifts are often used in **commercial, industrial, and outdoor applications** where flexibility and precision are key.

What's the difference between articulating and telescopic boom lifts?

Can JLG articulating boom lifts handle rough terrain?
