Stock: JLG225654

Status: Used

Location: PA

Product Hours: 1824

Product Drive: 4wd

Fuel Type: Diesel

Working Height: 51

Engine Make: Deutz

Tires: Foamfilled

Description

This **2017 JLG 450AJ articulating boom lift** is a versatile diesel-powered aerial work platform designed to provide excellent up-and-over access for construction, maintenance, industrial, and facility applications. With a **45 ft platform height, 25 ft horizontal reach,**

and articulating boom design, the 450AJ gives operators the ability to position the platform around obstacles and reach difficult work areas.

This machine has **1,824 hours** and a **550 lb platform capacity**. Its rough-terrain chassis, four-wheel drive, and **45% gradeability** make the 450AJ well suited for outdoor jobsites where traction and maneuverability are important.

The machine presents as a used rental-fleet unit with normal cosmetic wear consistent with its age and previous use. The photos show a straight overall machine with good-looking rough-terrain tires and the expected cosmetic wear to the paint, decals, and platform.

The JLG 450AJ is a popular mid-size articulating boom because it combines useful working height and outreach with a relatively compact footprint. It is a strong choice for contractors and maintenance operations needing an articulating boom without moving into a larger, heavier machine.

Key Details

Year: 2017

Manufacturer: JLG

Model: 450AJ

Equipment Type: Articulating Boom Lift

Hours: 1,824

Serial Number: 0300225654

Platform Height: 45 ft

FAQ's About JLG Articulating Boom Lifts

What is an articulating boom lift used for?

Articulating boom lifts from JLG are designed for **elevated work in hard-to-reach or obstructed areas**. Their multiple hinged sections allow operators to go “up and over” obstacles, making them ideal for:

- Building and **facility maintenance**
- **Construction work** around structures
- **Tree trimming** and outdoor signage
- **Electrical and utility work**

These lifts are often used in **commercial, industrial, and outdoor applications** where flexibility and precision are key.

What's the difference between articulating and telescopic boom lifts?

Can JLG articulating boom lifts handle rough terrain?
